

Good Grass Comes From Good Soil

Please join area pasture managers in a discussion about Marin and Sonoma soils. How can managers avoid compaction and increase water storage in their soils? What prescriptions are there for timing and intensity of use that will improve soil conditions, pasture and rangeland production, and problems with runoff? These and other soil properties and management topics will be covered during presentations and field site visits.

PRESENTERS: *Dr. Anthony O'Geen* – Soil Specialist, Land Air and Water Resources Department, UC Davis

Dr. Stephanie Larson – Livestock and Range Management Advisor, UC Cooperative Extension

DATE & TIME: Thursday, November 18, 2010, 10:00am – 2:00pm

LOCATION: Valley Ford School House, 14355 School Street, Valley Ford, California

Please **RSVP by November 12, 2006** to Franny Healey at 415-499-4204 (fhealey@co.marin.ca.us). Lunch provided (\$5 donations). Do not hesitate to contact David Lewis (djllewis@ucdavis.edu) or Stephanie Larson (slarson@ucdavis.edu) with questions.
