The Angora Fire: What will the Future Forest Be?

November 3, 2007 9 am-3 pm
Lake Tahoe Community College, South Lake Tahoe

Presented by
University of California Cooperative Extension

Workshop Objectives:

- Present an overview of forest ecology in the Tahoe Basin with emphasis on the Angora fire area
- Describe the effects of the Angora Fire on forest conditions
- Depict through modeling and examples from other burned areas what the Angora fire area will look like in 10, 20, 50 years
- Discuss the effects and effectiveness of different management strategies for restoring forests on Angora Ridge
