

University of California Integrated Pest Management Insect Update #16
Tehama County 6/24/13

INSECT	FIRST BIOFIX	SECOND BIOFIX	THIRD BIOFIX	FOURTH BIOFIX	ACTIVITY MOTHS/DAY	AVG. DEG. DAYS/DAY	DAY DEGREES FROM BIOFIX
CODLING MOTH	4/8	6/3	-	-	5.0	21.1	443
ORIENTAL FRUIT MOTH	3/4	5/6	6/13	-	3.3	26.9	306
PEACH TWIG BORER	4/1	6/3	-	-	12.7	24.1	464
NAVEL ORANGE WORM	4/11	6/17	-	-	.44	16.2	114
SAN JOSE SCALE	3/25	-	-	-	-	18.4	1446

Codling Moth are at 443 DD from the 6/3 biofix in the Ashley walnuts we monitor. We use two traps with combo lures located about 30 feet up in the canopy and check them Monday and Thursday each week. We did not see any "1B" activity this year so the next event should be the start of the third flight at about 1100 DD.

We are seeing consistent NOW egg laying on the four egg traps that we monitor in almond. Keep an eye on that pest.

Additional Pest management information plus twilight temperatures are available at the UC IPM website including a day degree calculator. <http://www.ipm.ucdavis.edu>.
