

The iJET Critical Trac™ service provides a global continuous GPS tracking capability for remote personnel and assets in high risk locations.

YOUR EXTENDED RESPONSE OPERATIONS CENTER FOR 24/7/365 SUPPORT

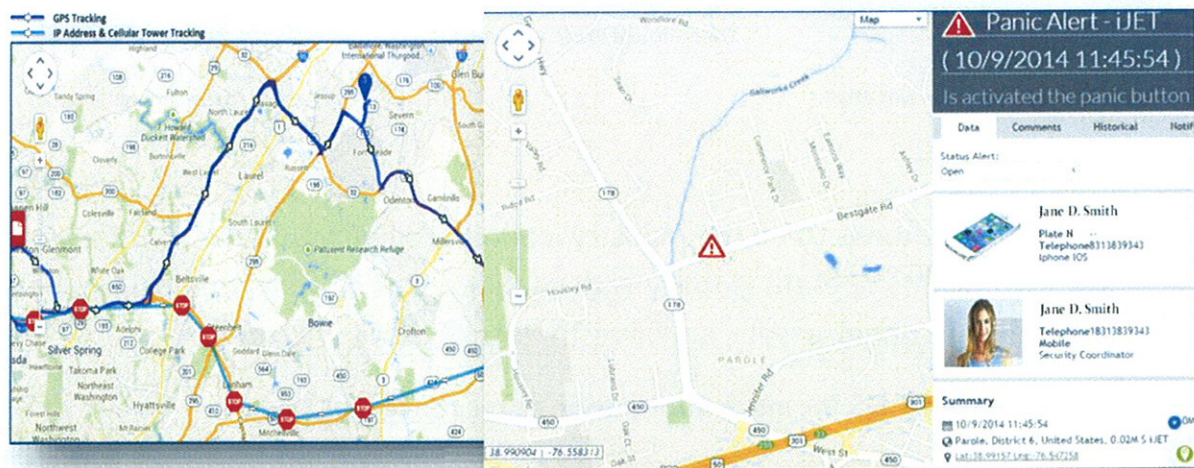

iJET's Critical Trac™ solution allows you to send employees to high-risk or remote destinations with greater peace of mind.

Two-way communication with one-button crisis and alerting functions put the iJET Global Operations Team at your employees' fingertips. No matter how tenuous or unique the situation, iJET is ready with state-of-the-art tools, on the ground intelligence and a global network of experts to provide the most effective assistance possible.

Critical Trac

Monitored, tracked and managed in iJET's Integrated Response Operations Center, Critical Trac™ provides:

- GPS location tracking with integrated client-specific response protocols
- User-defined location update options to conserve battery consumption
- 24/7/365 Monitoring and Response Services for event resolution
- Geo-fencing capabilities to mark routes and/or locations with protocol-specific alert criteria
- Audit Trail Report of incidents and corresponding response action

The Critical Trac™ Mobile App – Assistance is at your fingertips:

- One-button Crisis Alerting
- One-button Check-in Function
- Two-way SMS Communication
- “Keep alive” battery option to maximize battery life
- Map function to view current location on mobile device
- User defined tracking settings for precise location tracking
