We set the first biofix for codling moth at 4/3 in an Ashley walnut orchard just south of Red Bluff. OFM biofix for almond 3/13 and SJS for almond 3/30. The next event for CM will be female catch which we will use to estimate first egg hatch. 2 female CM caught 4/24/17. CIMIS Gerber measured sunset temperature 68.7 F on 4/21, 66.3 F on 4/22 and 64.5 on 4/23 suggesting possible egg laying.

No scale crawlers as of April 24 2017.
