

Are you interested in using prescribed fire as a management tool?

If so, this workshop is for you!

Topics include:

- Using prescribed fire to manage California rangelands
- Pathways to burn on private lands
- Prescribed fire permitting and legal considerations by Cal Fire
- Air quality and smoke management by local Air Quality Agency
- Fire weather: forecasting and online tools
- Fire terms and fire behavior
- Burn planning: developing a prescription, environmental considerations
- Burn unit preparation: techniques, firebreaks, equipment by Cal Fire
- Tools and equipment for the day of burn
- Mop up and patrol by Cal Fire

And, a prescribed fire demonstration and training burn!
