

# GLENN COUNTY PARTNERS BRING YOU PROGRAMS 101 FOR FARMERS & RANCHERS

## 2nd Annual!

Come learn about local, state and federal funding opportunities to implement new management practices on YOUR FARM OR RANCH. The Resource Conservation District is bringing together the County's Department of Agriculture, Air Pollution Control District, USDA Natural Resources Conservation Service, USDA Farm Service Agency and the UC Cooperative Extension-Glenn County to help you learn about cost-share funding opportunities and loan options! Programs include:

- ◆ Carl Moyer and FARMER Programs
- ◆ CDFA Healthy Soils Program
- ◆ CDFA Alternative Manure Management Program
- ◆ Farm Bill Programs: EQIP, CSP, NAP, TAP, the list goes on
- ◆ And, more!

Your Partners will break the programs down so you may see what is available. Then you can talk one-on-one with their technical advisors to create a plan, or not. It's worth exploring, right?!

## WHEN

**Friday, January 10, 2020**

**8 am - Coffee & A Little Breakfast**

**8:30-9:30 am - 10 MIN Presentations by Each Partner**

**9:30-11:30 am - Open House, One-On-Ones**

## WHERE

**Glenn Success Square - Conference Center  
131 E Walker Street, Orland, CA**

**WWW.GLENNCOUNTYRCD.ORG**

## SPONSORS

**+ Grower led Soil Health  
Technical Advisory  
Committee**

**RSVP SPACE LIMITED**

**Kandi Manhart  
Glenn County RCD**

**kandi@glenncountyrcd.org**

**530.934.4601 x5**

# FUNDING OPPORTUNITIES

## ◆ Carl Moyer and FARMER Programs

Voluntary grant programs that reduce air pollution, primarily from diesel vehicles and equipment, by providing incentive funds to purchase cleaner-than-required engines and equipment. These cost-share grant programs generally require the destruction of an older polluting engine and replacing it with the least polluting equipment available. All projects selected by the District must be in compliance with local and state regulations at time of contracting.

## ◆ CDFA Healthy Soils Program

The HSP Incentives Program provides financial assistance for implementation of conservation management that improves soil health, sequester carbon and reduce greenhouse gas (GHG) emissions. The HSP Demonstration Projects showcase farmers and rancher's implementation of HSP practices.

## ◆ CDFA Alternative Manure Management Program

Move over to non-digester management practices that reduce methane emissions from dairy and livestock operations. Receive up to \$750,000 in funding, up to 100% of project cost.

## ◆ Farm Bill Programs: EQIP, CSP, NAP, TAP, the list goes on

The Environmental Quality Incentives Program (EQIP) provides financial and technical assistance to agricultural producers in order to address natural resource concerns and deliver environmental benefits such as improved water and air quality, conserved ground and surface water, reduced soil erosion and sedimentation or improved or created wildlife habitat.

Conservation Stewardship Program (CSP) helps agricultural producers maintain and improve their existing conservation systems and adopt additional conservation activities to address priority resources concerns. Participants earn CSP payments for conservation performance - - the higher the performance, the higher the payment.

Noninsured Crop Disaster Assistance Program (NAP) provides financial assistance to producers of noninsurable crops to protect against natural disasters that result in lower yields or crop losses, or prevents crop planting.

Tree Assistance Program (TAP) provides financial assistance to qualifying orchardists and nursery tree growers to replant or rehabilitate eligible trees, bushes and vines damaged by natural disasters.

FSA Loans offer low-interest loans to new farmers unable to obtain commercial financing as well as loans for young farmers and small to mid-sized family farm operations for land, equipment and operating costs as well as direct loans for cold storage, bulk tanks and handling equipment.
