

Friends,

SAVE THE DATE

“Crunching the Numbers on Compost”

Our 4th in a Series of Healthy Soils Field Days

October 28th 2019

9:30 – 11:30 am

Ted Chamberlin Ranch, Los Olivos CA

The day will include:

- **Research results** on the impact of compost on CA rangeland - forage quantity & quality, GHG emissions, and soil health. *The preliminary results of our first year of data collection are in!*
- **Live demonstration** of compost application on rangeland at Ted Chamberlin Ranch
- Discussion of the **financing opportunities** available for conservation practices (including compost), and how the numbers can work in your favor.

Presenters will include representatives from the UC Cooperative Extension, UC Santa Barbara (Ecology, Evolution, and Marine Biology), the Natural Resources Conservation Service, the Cachuma Resource Conservation District, and others.

The event is FREE. Coffee & light breakfast included.
More information to follow.

PLEASE RSVP BY OCTOBER 21ST
