

What Do I Do Know?

Inventory

Capture value

Set Goals

- 1) Establish conifers and grow to commercial forest
- 2) Establish conifers to satisfy non economic values
- 3) Protect infrastructure
- 4) Preserve soil productivity
- 5) Establish vegetation type resistant to future catastrophic loss

Assess Resources

- Explore Available Cost Share Programs, EQUIP, CFIP
- What Rate of Return do I expect on my investment
- How much of my money do I want to invest.

Management Options

- Remove hazards clean drainage structures
- Do nothing
- Control fuels as they grow back
- Build a structure
- Plant a forest

Insure Safe Environment

What are my neighbors management goals and practices

I want to plant trees

Find or order seedlings

Decide on planting spacing and configuration

Take advantage of site preparation

Followup Release and Brush Control

Pruning

Pre-commercial Thinning

Reforestation Costs

Educate the masses

Change the way we are managing our resources

- 1) 257,000 acres but it is not that bad only 8% severely burned.
- 2) "Rain hampers fire suppression efforts."
