Question	Answer(s)
Can all participants be shown at the Zoom meetings (not just the panel members)? Because most of us are working remotely and don't see our colleagues in person, it would be nice to be able to at least see them virtually.	Thank you for making this suggestion. We use the webinar function where participants are not see) because of high number of participants. We'll discuss and see if that can be accommodated in some way. It is good to be able to see colleagues!
With regard to County funding, it might be good for ANR Leadership, to see if they could be on the agenda of CSAC to explain county funding. Especially once the ratios and what is needed to provide CE within the counties.	These sets of data are just about to be released for discussion with the CDs
What subject does the project scientist cover?	The positions with work within the Berkeley Food Institute.
Can you provide the detail on the two AC positions that were funded by Dept of Conservation (project scientist?)	These are Academic Coordinator positions in Fresno (under recruitment) and San Diego (hired) to work with communities as part of the Sustainable Ag Lands Conservation program.
Will the Small Farms staff (at the very least) salaries be fully restored with the budget?	We have 1 yr funding to add 2 Advisors and 8 CES positions to the small farm program. The plan is to secure 2 additional years of funding in FY22-23. Wendy is willing to meet offline to discuss any issues with existing staff.
To my understanding, we do not have a recorded standardized training for field workers entering agricultural fields in the 30 days after a pesticide has been applied. We are legally required to give this training as employers, but some of us aren't certified and many of us are certified but maybe not great at it.	(Answered live - see the recording)
Is this something Sara's office could provide?	Referred to Brian Oatman, Director, Risk & Safety Services

How is 'network-smart extension' defined? I like it.	see here:http://calag.ucanr.edu/Archive/?article=ca.E.v069n02p113 (work by Mark Lubell): Network-smart extension means taking advantage of existing network structure or restructuring the network by adding nodes and links, or rewriting existing links, with the goal of more efficiently connecting those with solutions to those with questions (Valente 2012). The goals of network-smart extension are to (1) increase grower awareness of what others know, (2) encourage growers to value what others know, (3) increase access to what others know and (4) decrease costs associated with accessing what others know (Cross and Borgatti 2003). These goals can be achieved through any number of creative extension strategies. Here, we propose four that have relevance to Cooperative Extension and other agricultural support organizations.
In terms of registering our web pages, is this also for internally focused web pages? e.g. our evaluation resources for CE programs	(Answered live - see the recording)
Update on Accellion cyber attack?	(Answered live - see the recording)
Also, can you share the link for where we can find updated protocols for the 2nd St Bldg if someone tests positive that had been in the bldg?	https://ucanr.edu/sites/safety/files/331768.pdf
Any updates on the IT hack??	(Answered live - see the recording)
Will the "flu" season end on May 1 for UC?	We are seeking guidance from UCOP on when the Executive Order requiring flu vaccination will end. We will update all employees when we have an answer.
Any estimate on when we will find out if our information was taken?	https://ucnet.universityofcalifornia.edu/data-security/updates-faq/index.html
I am also curious about registering blogs for the IWP. Do we need to register blogs individually?	Register any active blogs if it is managed separately from a website.
Everyone I know has had their info compromised. Has the security been corrected on UCPATH's end?	https://ucnet.universityofcalifornia.edu/data-security/updates-faq/index.html
Can we have an open Q&A session for the IWP? Office hours? With IT and Jon Wilson?	People will receive an invitation to participate in open hours for the IWP when they register their site.
