REGISTRATION

DESCRIPTION

In celebration of Earth Day 2022 - Invest in Our Planet, the Ramona Ranch Vineyard and Winery and the University of California Cooperative Extension San Diego invite you to this field training. Strategies and assistance programs for evaluating irrigation system efficiency and managing runoff water will be demonstrated and discussed.

Local farm producers understand the conservation of their water resources is vital to sustainable agribusiness. The installation and management of agricultural irrigation water efficiency technologies and systems that will result in on-farm water savings and no increase to or reduction in GHG emissions also contribute toward an investment in local ecosystems and in our planet.

SPEAKERS

Gerardo (Gerry) Spinelli, Ph.D. - Advisor, UC Cooperative Extension
Teri Kerns - Co-Owner, Ramona Ranch Winery
County of San Diego Waterscape Rebate Program

CONTINUING EDUCATION UNITS

- ▶ San Diego Region Irrigated Lands Group - 1.5 hrs
Pre-Registration Requested
