

What defines scrap metal?

Bits and pieces of metal parts (e.g., bars, turnings, rods, sheets, wire) or metal pieces that may be combined together with bolts or soldering (e.g., radiators, scrap automobiles, railroad box cars), which when worn or superfluous can be recycled.

Make recycling a priority!

According to the <u>Department of Toxic Substance Control (DTSC)</u>, "Scrap metal is not subject to hazardous waste management requirements if it is being recycled."

If you are not recycling your scrap metal, you need to determine if it is considered hazardous material, and follow disposal guidelines.

Find Certified Appliance Recyclers (CAR)

Click here to access this list and search for certified recyclers in your area.

Contact a CAR and ensure that any hauler/carrier you utilize provides a receipt confirming the transportation of your scrap metal to a designated recycling facility.

Record-Keeping

Maintain accurate records of waste generation, storage, transportation, treatment, and disposal activities.

Before disposal, it's required to receive approval from Brian Oatman via <u>this form</u>.

Complete the <u>Bill of Lading</u> and ensure the Carrier and/or Receiving Facility sign and return the form back to your REC.
